APPLICATION AND INFORMED CONSENT FOR STERILIZATION PROCEDURE

Smt/Shri _____ (client) hereby give consent for my sterilization operation. I am ever married. My age is_____years and my husband / wife's age is_____years. I have_____Male and_____Female living children. The age of my youngest living child is_____years.

a) I have decided to undergo the sterilization / re-sterilization operation on my own without any outside pressure, inducement or force. I declare that I / my spouse have / has not been sterilized previously (not applicable in case of re-sterilization).

b) I am aware that other methods of contraception are available to me. I know that for all practical purposes this operation is permanent and I also know there are chances of failure of the operation for which the operating doctor and health facility will not be held responsible by me or by my relatives or any other person whomsoever.

c) I am aware that I am undergoing an operation, which carries an element of risk.

d) The eligibility criteria for the operation is have been explained to me and I affirm that I am eligible to undergo the operation according to the criteria.

e) I agree to undergo the operation under any type of anaesthesia, which the doctor/health facility thinks suitable for me and to be given other medicines as considered appropriate by the doctor/ health facility concerned. I also give consent for any additional life-saving procedure, if required.

f) In case due to any reason both Tubes/Vas cannot be ligated, the Sterilization Procedure will be considered as Incomplete/ Not Done. In such an event 'Sterilization Certificate' will not be issued.

g) I agree to come for follow-up visits to the Doctor/Clinic as instructed, failing which I shall be responsible for the consequences, if any if I do not report on time.

h) If, after the sterilization operation, I / my wife experiences a missed menstrual cycle, then I / she shall report within two weeks of the missed menstrual cycle to Stree Clinic and if found to be pregnant, may avail the facility of MTP procedure free of cost. Failing which, I shall be responsible for the consequences, if any.

i) **For Male Sterilization only:** I understand that vasectomy does not ensure immediate sterilization and will use a method of contraception for a period of at least three months and till the success of the operation is certified after the satisfactory Semen test. I agree to come for Semen Examination 3 months after the operation to confirm the success of Sterilization Surgery (Azoospermia) failing which I shall be responsible for the consequences, if any.

j) In case of complications of during and / or after the procedures, failure and the unlikely event of death attributable to sterilization, I / my spouse and dependant unmarried children will be entitled for compensation from service provider to the maximum extent declared under the existing provisions of "Family Planning Compensation Scheme" of the Government of India, which has been explained to me in detail by the Stree Clinic. I undertake that after acceptance of compensation by us, either I, my husband or my children shall not be entitled to claim before any court of law/statutory authority regarding any other compensation including compensation for upbringing of the child, if any child born on account of failure of sterilization.

k) I understand and agree that if transfer to another hospital / nursing home facility is necessary, the clinic/organization does not assume any responsibility for either expenses incurred therein or expenses which may be incurred should any complication develop as a consequence of any of the procedure/s or later on.

l) I agree to come for follow-up visits to the Doctor/Clinic as instructed, failing which I shall be responsible for the consequences, if any if I do not report on time.

I hereby confirm that the information on general issues and clinical history are correct and that nothing material has been withheld, as such, I shall be solely liable for any implication and / or complication arising due to non - disclosure of relevant information.

I have read the above information or the above information has been read out and explained to me in my own language and that this form has the authority of a legal document.

I am aware that I have the option of deciding against the sterilization procedure at any time without sacrificing my rights to other reproductive health services.
